Examples of Reviewers' Comments

- 1. What elements/features from the course would you recommend to other faculty members who also teach gen ed courses in western civilization?
 - Absolutely comprehensive work with students, having them re-write essay drafts. Emphasis on critical thinking. Novel idea of going back chronologically from the present
 - Nicely structured around 3 major themes rationalism, religion & animalism through time. good use of having students go to museums & understand contemporary concepts derived from historical periods
 - Internet Source Evaluation assignment really effectively addressed gen ed outcome #3
 - The tone of the syllabus was warm and inviting both reviewers were quite impressed. The person also had an excellent section in the syllabus about how to read in preparation for class discussion that was terrific
 - This person also had fantastic assessment tools and grading rubrics for all of the assignments
- 2. In terms of addressing the intended gen ed learning outcomes, what suggestions would you give to the faculty member?
 - Would suggest integration of Gen Ed learning outcomes more intentionally into the syllabus and the assignments. The course content is congruent with the gen ed learning outcomes, but articulation to students could be improved
 - We'll want to encourage [faculty members] to integrate the general education learning goals/objectives with their own. Moreover, while they have the life, liberty and pursuit of happiness document, an example of a brief paragraph for syllabi or even how to relate it to important questions of the day might help students see how this has relevance for them
