Arts

Description and Learning Outcomes

Mason courses in the film making, visual and performing arts stress generative, inquiry-based learning through direct aesthetic and creative experience in the studio environment. Art History courses address the intrinsic relationship of personal and cultural creativity, and the manifestation of aesthetics, visual culture and visual narrative within historical contexts.

Courses in the Arts category must meet the first learning outcome and a minimum of two of the remaining four learning outcomes:

1. **Artistic Processes & Concepts:** Demonstrate an understanding of the relationship between artistic process, and a work's underlying concept, and where appropriate, contexts associated with the work.
2. **Formal Elements & Vocabulary:** Identify and analyze the formal elements of a particular art form using vocabulary and critique appropriate to that form.
3. **Cultural Productions:** Analyze cultural productions using standards appropriate to the form, as well as the works cultural significance and context.
4. **Social, Historical, and Personal Contexts:** Analyze and interpret the content of material or performance culture through its social, historical, and personal contexts.
5. **Engage in Artistic or Creative Processes:** Engage in generative artistic processes, including conception, creation, and ongoing critical analysis.

Approved Courses and Enrollment

Students are required to pass one course approved for Arts or transfer in an appropriate course. During the assessment period, 88 courses were approved to meet the Arts requirement. The College of Visual and Performing Arts and the College of Humanities and Social Sciences host all of the Mason Core Arts courses. See page 24 for the list of approved courses.

Mason Core Arts courses enroll almost 9,000 students each year with an average class size of 28 (see Table 2). Figure 5 shows enrollment trends over the past five years. The School of Music teaches the most students, enrolling 28.5% of all Mason Core Arts students, followed by School of Art (17.6%), School of Dance (17%), and History & Art History (15.6%).

Students in the Honors College take HNRS 122: Reading the Arts to fulfill their learning outcomes in this category. Although not formally a part of the Mason Core, HNRS 122 is also included in this assessment.
Courses Included in Assessment

The assessment period included 163 sections of Mason Core Arts courses taught in fall 2018 and nine sections of Honors 122. All but 20 sections offered in the assessment period were expected to participate. Of the 152 course sections included in the assessment period, 86% submitted materials.

Enrollment and Grades Distribution

A total of 4,579 students enrolled in Arts courses, and 216 enrolled in HNRS 122 in the assessment period. Of these students, 92% passed their courses with a C- or above (0.9% audited courses) (see Figure 1).

Figure 1. Grades Distribution for Mason Core Arts Courses, Fall 2018

Assessment Methods

Student work samples of all kinds—written, audio, visual—were requested from all course sections taught in the assessment period. Faculty were asked to submit samples that represented student submissions completed in the final third part of the semester and that allowed students to demonstrate their learning on one or more of the expected course learning outcomes. Samples were selected using randomized course enrollment lists to insure the best possible representative sample.

The Mason Core Rubric for Evaluating Student Work in Arts Courses was used for this assessment. The rubric was developed by Mason faculty as a tool to assess individual student work on five learning tasks or outcomes. The rubric uses four performance descriptors: Benchmark, Emerging Milestone, Advanced Milestone, and Capstone, as well as an option for "no evidence." The performance descriptors are developmental, identifying student
performance levels in a context of learning and growth. The rubric is intended to be used across all of the years of a student's college experience, and is not limited to a single course, assignment, or student class level.

Using a process modeled after the VALUE Institute reviewer calibration, faculty reviewers were trained to use the rubric to assess student work. Reviews were normed to produce consistent ratings across reviewers. Reviewers met for an in-person, one-day training and review session and completed the reviews of student work by the end of the day. Reviewers were faculty members who have taught Mason Core Arts courses. Reviewers earned a small stipend for their efforts.

Each student work sample was assessed twice. Results were analyzed for interrater reliability; discrepant reviews were resolved using a third review.

One set of issues arose in conversations with Music faculty about how to assess student performance of learning outcomes in music ensemble courses (e.g. jazz ensemble, Chorale, etc.). Because individual performance in these settings is interdependent with others and thus cannot be assessed in a single sample of student work, the assessment strategy had to be different. In collaboration with the School of Music’s undergraduate curriculum committee, a holistic rubric was developed. The School of Music Rubric for Evaluating Mason Core Outcomes Student Ensemble Holistic Assessment asked instructors to assess individual students’ holistic performance on four learning outcomes over the entire semester. These scores were averaged for each student and rolled into Outcome #5, Engage in Artistic or Creative Processes.

Learning Outcomes Assessment Results

Figures 2 and 3 display results from 343 randomly selected student work samples rated on the rubric, including 39 students rated on the holistic rubric. Figure 2 includes “no evidence” ratings; a rating of “no evidence” was used when the learning outcome could not be seen in the sample; this could mean that either the assignment did not require application of the outcome, or that the student did not demonstrate it. A “no evidence” rating provides important information in aggregate but is given no value for an individual sample.

**Highlights from Analysis of Results**

Data were analyzed to ascertain differences among courses in achieving the five learning outcomes. Comparison tests were conducted using nonparametric statistics because rubric data are ordinal; Independent-Samples Kruskal–Wallis H test was used to analyze differences across courses. “No evidence” was treated as missing. Significant findings ($p < .05$) are noted in the discussion below and in Table 2.

Work samples were least likely to show evidence of **Engage in Artistic or Creative Processes**. Although many of the Arts courses are focused on making or performing art, many faculty members expected this to be too challenging to submit (i.e. video or audio recordings) or to assess (i.e. group choreography), and many (but not all) chose to submit written work instead. This outcome was most likely to be evident in Art & Visual Technology and Music.

Forty percent of samples showed no evidence for **Social, Historical, and Personal Contexts**. This outcome was most likely to be evident in Art History, Honors, Integrative Studies, and Philosophy.

For courses that are classified as “Lecture,” student work samples were rated significantly higher than courses classified as “Studio” for Outcome #3, Cultural Productions. Perhaps unsurprisingly, work samples from “Studio” courses were rated significantly higher for **Engage in Artistic or Creative Processes**.

Because the Mason Core Arts courses offer a mix of introductory and advanced courses, it was important to disaggregate the assessment results by lower- and upper-division courses. There were differences in ratings of work samples across lower-division subjects. The highest significant ratings for each learning outcome are listed in Table 2.

**Student Self-Assessment**

All students who were enrolled in a Mason Core Arts course during the assessment period received an online self-assessment survey at the end of the semester. The retrospective pre-post self-assessment asked students to rate their knowledge and skills on five learning outcomes at the beginning of the semester (pre), and then again at the end of the semester (post). In total, 264 students completed both the pre and post items, resulting in a 5.5% response rate. A t-test pairwise comparison showed significant perceived learning gains on all five outcomes (see Figure 4).

**Figure 4. Mean Scores on Student Learning Self-Assessment**

![Mean Scores on Student Learning Self-Assessment](image)

Mean scores, self-reported on a scale of 1-4, n=264, * p < .05

**How do the Results Meet Expectations?**

Because this was the first time that Mason used this rubric to assess student work, these data provide baseline information. For the next assessment cycle, refinements will need to be made to the assessment strategy so that the assessment better aligns with courses that emphasize arts production (see “Limitations of this Assessment” below).

**How are Results Being Used to Improve Students’ Educational Experience?**

A series of open meetings were held in fall 2019 to share results. Faculty were encouraged to discuss the results of the assessment within their units. All Mason Core Arts faculty were expected to participate in a pre-semester workshop on syllabus and assignment design; School of Music faculty took the opportunity to revise their syllabi for Mason Core courses, using the guidance provided in the workshop. In spring 2020, the new director for the School of Art shared plans to evaluate and restructure the school’s curriculum to reach more students across campus, and is drawing upon the data for this purpose.
Limitations of this Assessment

**How to assess learning across the Arts?** The assessment of student learning outcomes in a general education arts program is not a straightforward task. There is little guidance for assessing general education arts outcomes in higher education (Joe, Harmes, & Barry, 2008). Mason Core Arts courses span 11 disciplines and experiences from arts appreciation, literary criticism, choreography, original painting, jazz ensemble performance, and more. This assessment piloted a new rubric that attempted to create performance descriptors inclusive of all disciplines.

**Did it work?** Some samples aligned to the rubric better than others. In arts production, much of the effort is team-based, so individual performance is difficult or inappropriate to discern. Also, the results of artistic work (e.g. Dance, photography) may not articulate the underlying elements; that is, it is unlikely that the process of producing art would be evident in a final product.

**Recommendation:** The Student Ensemble Holistic Assessment rubric was developed to assess student performance on key learning outcomes in music ensembles. Scores on this rubric can be rolled up into the primary rubric for analysis and reporting. It is recommended that similar holistic rubrics be developed for Mason Core assessment in other subjects, such as Dance, Art and Visual Design, and Theatre.

**Assessment Rubric(s)**

The Mason Core Rubric for Evaluating Student Work in Arts Courses was developed by a team of Mason Arts faculty to evaluate student work for the Mason Core learning outcomes in the Arts. The rubric was modeled after the AAC&U VALUE rubrics. The rubric is designed to evaluate student performance on five learning outcomes, with four increasingly sophisticated performance descriptors for each outcome. The rubric can be used with many types of student work. Most student work will not show evidence of all five outcomes; in this case, an additional category for “no evidence” should be made available.

The School of Music Rubric for Evaluating Mason Core Outcomes: Student Ensemble Holistic Assessment was developed by the School of Music Undergraduate Committee to assess individual student performance in ensemble music courses.

Mason Core Rubric for Evaluating Student Work in Arts Courses

This rubric was developed by a team of faculty experts to evaluate student work for the Mason Core learning outcomes in Arts. For more information about the learning outcomes and approved courses, [https://masoncore.gmu.edu/arts-2/](https://masoncore.gmu.edu/arts-2/)

**How to use this rubric:** This rubric is designed to evaluate student performance on five learning outcomes, with four increasingly sophisticated performance descriptors for each outcome. This rubric can be used with many types of student work (i.e. written, visual, performance). Most student work will not show evidence of all five outcomes; in this case, an additional category for “no evidence” should be made available.

## School of Music Rubric for Evaluating Mason Core Outcomes | Student Ensemble Holistic Assessment

**Course:** ________________________________  
**Instructor:** ________________________________  
**Student:** ________________________________

Circle the **performance descriptor** how you would rate the student’s **overall consistent level of performance** on each of the four learning outcomes throughout the semester.

<table>
<thead>
<tr>
<th>Student Learning Outcomes</th>
<th>Performance Descriptors</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Student will demonstrate historical awareness through stylistically appropriate performance.</strong></td>
<td>Capstone: Student consistently and fluently applies stylistic conventions and performs comfortably in the appropriate style. Advanced Milestone: Student demonstrates facility in applying stylistic conventions in much of the performance. Emerging Milestone: Student shows some awareness of appropriate aspects of style but may apply them inconsistently or with halting facility. Benchmark: Student recognizes basic elements of stylistic playing in at least some instances.</td>
</tr>
<tr>
<td><strong>Student will demonstrate awareness of theory and form through stylistically appropriate performance.</strong></td>
<td>Capstone: Student consistently and fluently responds to formal landmarks and harmonic/melodic constructs, applies stylistic conventions, and performs comfortably. Advanced Milestone: Student shows consistent awareness of formal landmarks and harmonic/melodic constructs in applying stylistic conventions in much of the performance. Emerging Milestone: Student shows more awareness of formal landmarks and harmonic/melodic constructs but may respond to them with halting facility or inconsistently. Benchmark: Student responds to formal landmarks and responds to harmonic/melodic constructs with stylistic playing in at least a few instances.</td>
</tr>
<tr>
<td><strong>Student will demonstrate technical and expressive proficiency in support of the ensemble’s performance.</strong></td>
<td>Capstone: Nearly flawless technique and expression consistently. Advanced Milestone: Playing errors and technical difficulties are few; expression is free and fluent. Emerging Milestone: Playing errors and technical difficulties are less evident; expression is freer but still inconsistent. Benchmark: Student performs their part, but technical limitations limit expression and impede tight ensemble.</td>
</tr>
<tr>
<td><strong>Student will demonstrate musical communication skills by collectively creating a collaborative musical environment.</strong></td>
<td>Capstone: Fluent communication; expressive student generated ensemble interpretation. Advanced Milestone: Consistent communication across the ensemble with minimal errors caused by inattention. Emerging Milestone: Some communication allows for better group cohesion and collaborative expression. Benchmark: Minimal ensemble communication, student “locked” in their own parts.</td>
</tr>
</tbody>
