

Mason Core Category: Information Technology and Computing Proposal Worksheet

General Overview

Information technology and computing can significantly augment humans' ability to produce, consume, process, and communicate information. Thus, students need to understand ways to use such technology to enhance their lives, careers, and society, while being mindful of challenges such as security, source reliability, automation, and ethical implications. These factors have made it essential for students to understand how to effectively navigate the evolving technological landscape. IT courses offered in the majors may focus on disciplinary applications and concerns of information technology.

Required: One approved 3-credit course that meets all IT requirements or an approved sequence of courses that meet all IT requirements.

Please keep in mind:

- Mason Core Committee members are a cross-section of the University. Please avoid discipline specific terminology and provide as much context as possible to facilitate the review process. Fully explain any terms that are unique to your area.
- As a part of the Mason Core on-going assessment process, you will be asked to regularly submit assignments that directly link to the category learning outcomes. Student work samples will be requested as well.

Required Documentation

- Syllabus with statement that this course meets the Information Technology and Computing Core requirement with a list of the category learning outcomes
- Completed proposal worksheet (this form)
- Example assignments (as needed to support proposal)
- Example assessments (as needed to support proposal)

Learning Outcomes:

Upon completing an Information Technology and Computing course, students will be able to:

1. Understand the principles of information storage, exchange, security, and privacy and be aware of related ethical issues.
2. Consume digital information critically, capable of selecting and evaluating appropriate, relevant, and trustworthy sources of information.
3. Use appropriate information and computing technologies to organize and analyze information and use it to guide decision-making.
4. Choose and apply appropriate algorithmic methods to solve a problem.

Rationale

Please provide a succinct rationale (no *more* than 500 words) for why this course should be considered for the Mason Core. Why does this course add to the available catalog of Mason Core courses?

Assignment Map

For each learning outcome, fully describe the assignment, clearly explain how the assignment meets the learning outcome, and discuss how the assignment will be assessed to provide evidence the learning outcome was met. If you are using an exam, test or quiz to assess learning, please include the questions. An assignment may meet more than one learning outcome. All outcomes must be met.

Outcome	Assignment	Explanation	Assessment
1. Understand the principles of information storage, exchange, security, and privacy and be aware of related ethical issues.			
2. Consume digital information critically, capable of selecting and evaluating appropriate, relevant, and trustworthy sources of information.			

Outcome	Assignment	Explanation	Assessment
3. Use appropriate information and computing technologies to organize and analyze information and use it to guide decision-making.			
4. Choose and apply appropriate algorithmic methods to solve a problem.			

Faculty Contact

It is very useful to have a faculty member who is familiar with the course attend the Mason Core Committee meeting in which the course is discussed. Please list at least one faculty member who will attend and answer questions.

Name	Email Address

Course Management Plan

Please describe your course management plan. This may need to be completed in consultation with your curriculum coordinator or department chair.

1. Please provide who will continue as the primary contact and/or administrator for this course going forward.

Name	Email Address

1. Please provide the person in your unit who is responsible for coordinating your curriculum.

Name	Email Address

2. How will your department ensure new instructors are aligning their assignments with Mason Core outcomes?
3. What professional development will you provide to new instructors in preparation for teaching the course?
4. Student evaluations of teaching (SETs) scores sometimes suffer when course content is difficult, or a new pedagogy is implemented. In recognition of this, how will your academic unit provide support for faculty who are teaching a challenging course?

Resources

Which of the following resources have you already consulted to help you understand the learning outcomes for the course you're proposing?

- [Mason Core Website](#) descriptions of outcomes
- Prior courses approved for this Mason Core category
- Consultation with Mason Core committee member
- Mason Core [Faculty Resources](#)
- [Proposal Workshop](#)
- [Additional Stearns Center Workshops](#)
- Other (please specify)
- None of these
